**RAL 4007-P**

HEX: #47244C  
anti-UV 4%

Each year we try to figure out which colours of polimarble are most attractive to use for our products. We do this by tracking which colour samples people order and add some extra beauties for new experiments. This year we discovered a new hue of green and purple.

If you like our 2020 colours and want to see them in real life, you can order a sample box from our website!

**LET'S MAKE PLASTIC VALUABLE TOGETHER!**
